

As a dedicated XM customer, i would just like to say that these services they are offering should not be banned because of the competition that it is stirs up with FM stations or other NAB members. Because i have XM radio, i am already not listening to those stations, because they were not meeting my needs. i feel that it is unfair to take these informative channels away because i am paying for services such as these. If the NAB has a problem with XM & satelitte radios offering these services, then they should come up with a better way to compete. however, it is completely unfair to stifle the competition because their product is simply more appealing to the public.
